Addendum to the OSH Manual

Plan for COVID-19
Exposure Prevention, Preparedness, and Response

Foreword

Our Company takes the health and safety of our employees very seriously. With the spread of the coronavirus or "COVID-19," a respiratory disease caused by the SARS-CoV-2 virus, the Company must remain vigilant in mitigating the outbreak.

To ensure employee safety and maintain operations, we have developed this COVID-19 Exposure Prevention, Preparedness, and Response Plan to be implemented and we have also reorganized the Occupational Health & Safety Committee.

This Plan is based on information available from the Department of Labor & Employment ("DOLE"), Department of Trade & Industry ("DTI"), the Inter-Agency Task Force ("IATF"), and the Center for Disease Control and Prevention ("CDC") and is subject to change based on further information provided. The Company may also amend this Plan based on operational needs.

This plan does not replace the OSH Manual. It is a supplemental guideline on safety and health protocols during the COVID-19 pandemic. If any protocol in this plan conflicts with the OSH Manual, the guidelines in this plan must be followed until further notice.

I. OSH Organization

The OSH Organization has been updated to support this plan. Due to the community quarantine restrictions, new members of the committee may not have access to accredited trainings for BOSH and First Aid. As a temporary alternative until the required services or resources are accessible, the new members will participate in an online learning session using reference materials moderated by the certified Safety Personnel of the company which complies with the prescribed 8-hour training syllabus DOLE-OSH, as well as reference materials by the American Red Cross.

Implementation & Development Cycle

Policies and programs of the OSH Organization are developed and implemented in collaboration by four functional units: ***The Executive Committee, HR Department, Compliance Team, and the OSH Committee***. The implementation and development cycle, as well as the roles of the collaborators shall proceed as presented below.

Advisory Panel

The OSH Committee is guided by an Advisory Panel composed of a Corporate Advisor for company vision, mission, values, and objectives, a HR Program Advisor for employee programs and engagement, a Compliance Advisor and Reports Coordinator for regulatory requirements.

Hierarchy of Authority

The ***OSH Core Committee*** is the mandated and registered committee for the OSH Organization. It is composed of a Chairperson and one Secretary/Team Lead (OSH-certified) for each of the Safety & Health sub-committees. Under the guidance of the Executive Committee and Advisory Panel, the Core Committee shall take initiative on all activities.

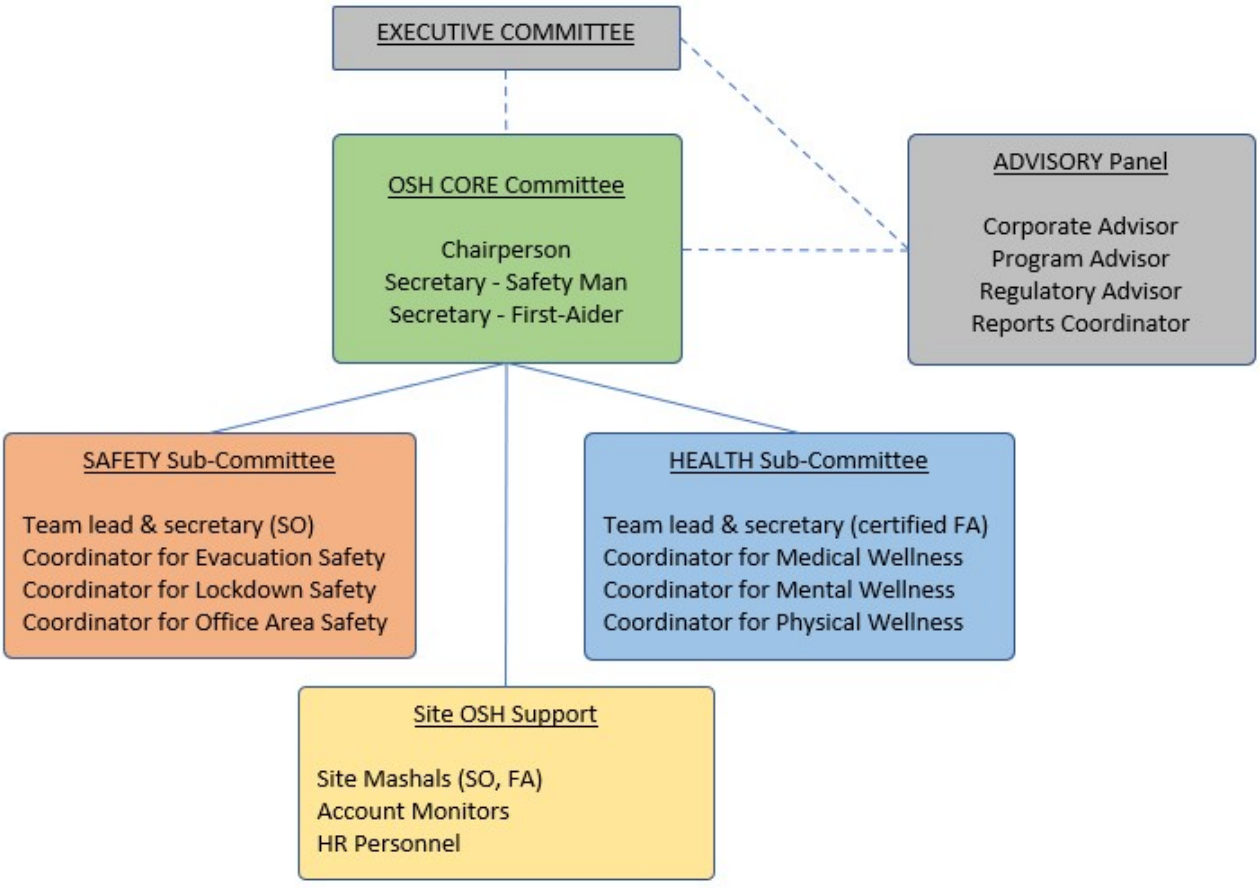

The ***Safety & Health Sub-Committees*** are composed of Event Coordinators who shall assist the Sub-Committee Team Leads with organizing and facilitating activities for all programs of the OSH Organization.

The ***Site OSH Support*** involved the following employees:

- Site Marshals are site employee representatives tasked with monitoring co-employee compliance to safety and health protocols. They shall also assist co-employees with emergency protocols.

- HR Personnel are tasked to communicate with all employees and process employee records to be able to provide the Core Committee the data needed to execute plans and procedures.

- Account Monitors are Marketing Representatives, Marketing Managers, Unit/Department Managers and Supervisors who oversee business accounts or functional units. They are expected to monitor account/unit requirements, ensure that all site shifts have site marshals present, and coordinate with the Core Committee for site/unit OSH needs.

III. Responsibilities of the OSH Committee

Employee Monitoring for COVID-19 Protocols

In addition to the general responsibilities of the OSH Committee, the following duties have been assigned to ensure that this plan will be successful in protecting employees from COVID-19 in the workplace:

- ***Site Marshals – an appointed employee per shift*** will continue doing their duties but will also actively observe the compliance of co-employees with these guidelines and provide OSH assistance to them as needed. He/she must do "rounds" every 2 or 3 hours to see how co-employees are doing, and report to HR and/or the Account Monitor immediately if an employee is absent, not complying with protocol, is not feeling well, or when there is an safety incident or accident. They must include OSH remarks in their end-of-day activity report to be submitted to the Account Monitors. The Site Marshal shall endorse client concerns on safety and health to the Account Monitor.

- ***Account Monitors – Marketing Representatives*** will ensure that a site marshal is present for each shift. In case of absence and the official site marshal, the account monitor must appoint a substitute and conduct a quick briefing over the phone to describe what needs to be done for that day then report the substitute to the Core Committee. Account Monitors will forward OSH reminders to Site Marshals as provided by the Core Committee.

- ***Account Monitors – Managers*** will ensure that Hazard Identification, Risk Assessment & Control (HIRAC) is conducted and documented for all jobs at each worksite to determine the potential exposure of employees to COVID-19 based on their duties and environment. The Core Committee share review the HIRAC and recommend control measures. The Hazard Identification Risk Assessment & Control template used by Managers is attached as "Annex B".

- ***HR Personnel - HR Communications Staff*** will still perform their regular duties but will also monitor in real time, the submission of the daily employee health declaration forms. Employees who fail to submit one (1) hour before the shift on record will be contacted via phone. If an employee cannot be contacted, the company will inform the client that the employee is not given authorization to proceed to the worksite for that day. As per Employee Handbook, employees who violate the safety protocols of the company are subject to disciplinary action including dismissal.

- ***HR Personnel – Payroll Staff*** will monitor the proper leave filing of employees via the online leave management system and report those with vague reasons for filing SL, those with at least two (2) days of sick leave and AWOL incidents to HR immediately. These reports will trigger HR to conduct health checks via phone. Sick leave data must be provided to the OSH Core Committee every first workday of the month for the previous month's leaves. A monthly illness and accident report will be submitted to DOLE monthly as mandated.

- ***Core Committee – Chairperson*** will ensure that all members of the OSH Committee know their responsibilities and the protocols or guidelines. The Chairperson will direct the Team Leaders on actions to be taken to ensure that these guidelines are executed as planned.

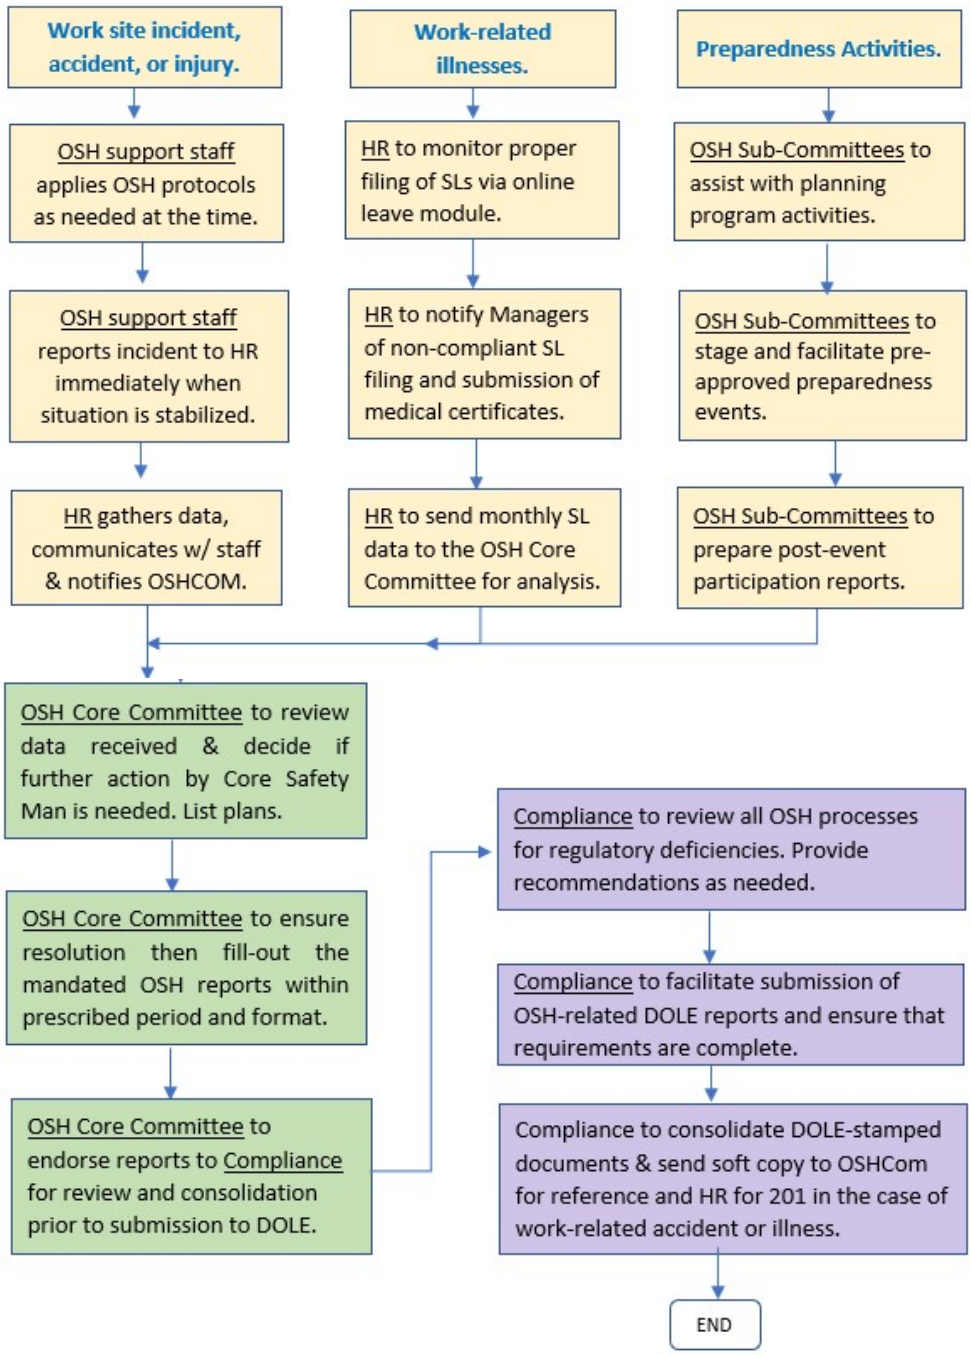

- ***Core Committee – Safety Team Leader*** will ensure that safety equipment included in this plan is adequate and prepare purchase proposals as needed. The Safety Team Leader will coordinate with Account Monitors for site safety equipment, if applicable, and for continuous learnings sessions for site marshals.

- ***Core Committee – Health Team Leader*** will ensure that medical supplies included in this plan are adequate and prepare purchase proposals as needed. The Health Team Leader will coordinate with Account Monitors for site first-aid kits and for continuous learnings sessions for site first aiders.

Appointment of OSH Committee Members

Participation in OSH is required by DOLE for all employees under DOLE Department Order 198-18. Managers will appoint employees who may join the sub-committees and site support team for at least two (2) years. Appointees for the Event Coordinator role must be employee at a specialist level up to supervisors with good attendance and performance record. Appointees for the Site Marshal role may be any employee with good attendance and performance record. All appointees will attend OSH certification trainings.

General Reporting Workflows

General Duties of OSH Committee

OSH CORE COMMITTEE	SCOPE	DUTIES
Ex-officio chairperson:	Policy Development	Leads policy development based on recommendations by SO, FA, and Adivsory Board.
		Final authority on plans and decision with OSH activities.
Secretary for Safety:	Safety Requirements	Performd duties mandated by DOLE-OSH under DO 198-18.
		Act as subject-matter coach to the Committee and document minutes of the meetings.
Secretary for Health:	Health Requirements	Performd duties mandated by DOLE-OSH under DO 198-18.
		Act as subject-matter coach to the Committee and document minutes of the meetings.
SAFETY SUB-COMMITTEE	**SCOPE**	**DUTIES**
Event Coordinator:	Evacuation Safety	Assist with facilitating protocols during events that require employees to evacuate.
		Assist with organizing activities and preparing materials for the programs.
Event Coordinator:	Lockdown Safety	Assist with facilitating protocols during events that require restriction of movement.
		Assist with organizing activities and preparing materials for the programs.
Event Coordinator	Work Area Safety	Assist with facilitating protocols that ensure office work area safety.
		Assist with organizing activities and preparing materials for the programs.
HEALTH SUB-COMMITTEE	**SCOPE**	**DUTIES**
Event Coordinator:	Medical Wellness	Assist with activities for First-Aid, APE, drug testing, monitoring illnesses, etc.
		Assist with organizing activities and preparing materials for the programs.
Event Coordinator:	Mental Wellness	Assist with behavioral, emotional, spiritual activities and "anti" programs
		Assist with organizing activities and preparing materials for the programs.
Event Coordinator:	Physical Wellness	Assist iwht activities for ergonomics, exercise, diet & nutrition, and life-stage wellness
		Assist with organizing activities and preparing materials for the programs.
SITE OSH SUPPORT	**SCOPE**	**DUTIES**
Site Marshals:	SO2+FA = 51-199 pax/shift SO1+FA = 1-50 pax/shift	Perform OSH duties as per DO 198-18 and guide site co-employees on OSH protocols. Monitoring site compliance and report findings or incidents to HR Personnel.
HR Personnel:	Communication	Communicate to and gather from employees, all OSH-relevant information and documents.
	Sick Leaves & Claims	Monitoring and reporting of sick leaves; ensuring proper leave & claim filing procedures.
Account Monitors:	Site Marshal Deployment	Ensure that a site marshal is present at all site shifts.
	Site Requirements	Know the site requirements for OSH and ensure compliance by the site team.

II. Responsibilities of Management

All managers and supervisors must be familiar with this Plan and be ready to answer questions from employees. Managers and supervisors must set a good example by following this Plan at all times. This involves practicing good personal hygiene and workplace safety practices to prevent the spread of the virus. Managers and supervisors must encourage this same behavior from all employees.

In the event that the OSH Core Committee is unable to perform its duties, the Executive Committee shall take over and assisted by the Management Committee.

IV. Responsibilities of Employees

The Company is asking every one of our employees to help with our prevention efforts while at work. In order to minimize the spread of COVID-19 at our worksites, everyone must play their part. As set forth below, the Company has instituted various preventive measures for employees to follow.

- Employees are expected to report to their department/account managers or supervisors if they are experiencing signs or symptoms of COVID-19, as described below. If you have a specific question about this Plan or COVID-19, please ask your site marshal, department/account manager or supervisor. If they cannot answer the question, please contact HR Communications.

- Employees must familiarize themselves with the symptoms of COVID-19, which is listed and updated in the online *Daily Employee Health Declaration Form* which can be accessed via the Employee Portal. A copy of this form is attached to this plan as "Annex A"

- Employees who fail to submit one (1) hour before the shift on record will be contacted via phone. If an employee cannot be contacted, the company will inform the client that the employee is not given authorization to proceed to the worksite for that day. As per Employee Handbook, employees who violate the safety protocols of the company are subject to disciplinary action including dismissal.

- If you develop a fever and symptoms of respiratory illness, such as cough or shortness of breath, **DO NOT GO TO WORK** and call HR right away. Likewise, if you come into close contact with someone showing these symptoms, call HR right away.

- Employees are expected to comply with guidelines implemented by our Safety & Health Committee ("OSH Committee") to protect employee at the workplace. These guidelines are presented in a video called "COVID-19 Pandemic: Hygiene & Sanitation in the Workplace" posted on the Employee Portal. A summary sheet of the guidelines in the video after viewing will be sent to the employee after viewing.

- All employees will need to sign an acknowledgement that they have viewed the videos and have received a copy of this Plan. Employees who are authorized members of the OSH Support Team will attend additional learning sessions on their OSH duties.

- Employees who perform their duties at client premises must cooperate with the site's safety and health protocols in addition to our company guidelines. To know about your client's site protocols, please coordinate with your Account Manager or Account Marketing Representative.

- Employees shall continue to comply with these DOLE mandated worker safety duties:

1. Participate in capacity building activities on safety and health and other OSH related topics and programs;
2. Proper use of all safeguards and safety devices furnished for workers' protection and that of others;
3. Comply with instructions to prevent accidents or imminent danger situations in the workplace;
4. Observe prescribed steps to be taken in cases of emergency including participation in the conduct of national or local disaster drills; and
5. Report to their immediate supervisor or any other responsible safety and health personnel any work hazard that may be discovered in the workplace.

V. General Worksite Protective Measures

In addition to the minimum health standards, the Company has instituted the following along with the guidelines in the "Hygiene & Sanitation in the Workplace" video.

- All employees reporting on site will be provided with washable cloth masks and alcohol-based hand disinfectant. The quantity and frequency for replenishment of these shall be determined by HR.

- All employees are expected to comply with daily health and security screening procedures with all sites where they are working in addition to the daily submission of online health declaration form.

- Any employee/contractor/visitor showing symptoms of COVID-19 on premises will be taken to an isolation area to wait until a recommendation from a medical professional is provided.

- Incoming deliveries will be permitted for company official business only and may be dropped-off at the designated receiving area and retried by the designated staff.

- The Company will divide employees into dedicated shifts, and some will be authorized to work from home on specified days. The Company will have sole discretion in making alteration in shifts and authorizing employees who can work from home.

- If practicable, each employee should use the same workstation and devices every shift.

- The Company will divide headquarters staff into two (2) groups where possible so that support operations can continue in the event that one of the divided teams is required to quarantine

IV. Worksite Cleaning and Disinfecting

These guidelines are for company premises excluding client sites which may have their own protocols. Employees who report to client sites are expected to comply with their protocols for employees of service providers.

- Employees performing cleaning will be issued proper personal protective equipment ("PPE"), such as washable protective cover (lab-gown type), washable rubber gloves, washable safety goggles, and washable face mask.

- Cleaners must be dedicated to only cleaning activities and must wear proper PPEs while cleaning and disposing garbage. Cleaners who are wearing PPEs are not allowed to sit or loiter in employee workstations, lunch areas, and meeting areas to prevent contamination from the PPEs used while cleaning.

- Cleaners must thoroughly wash their PPEs and cleaning equipment after cleaning procedures are done for the day. Washed items may be hanged overnighted in one of the toilet cubicles with an open window.

- There will no longer be a "general cleaning" on weekends because thorough cleaning is done daily, unless otherwise instructed by Management.

- Two cleaning employees will be needed. One will take the early shift at least 1 hour before the first employee arrives, and one will take the late shift which is at least 1 hour after office hours.

- Consumable cleaning supplies include large and small plastic garbage bags, clear plastic bags, washable rags, scrubbing pads/cleaning brushes, washable door mats, washable plastic brooms, disinfectant bleach

solution (Zonrox - Sodium Hypochlorite) in labeled spray bottles, measuring and mixing containers when diluting concentrated products, alcohol sanitizer with 60% to 90% isopropyl or ethyl alcohol, and cleaning detergent/bathroom cleaner.

- Non-consumable cleaning tools include foot bath tray, washable plastic brooms, mop handles, window squeegees, garbage collection bins, trolley dedicated to garbage transport (use separate trolley for office equipment).

- Tiled floor will be mopped with a bleach solution after all employees have left work area every day.

- Door handles, glass doors, front-desk counter, faucets, toilet flushers, elevator buttons, stair handrails, the tops of side panels and posts of work station units, and other surfaces frequently touched by employees will be wiped with a bleach solution once before the first employee arrives, every two hours during operations, and once after the last employee leaves the worksite every day.

- Surfaces in common areas such as tables and chairs hallways, meeting rooms, and lunch areas will be cleaned twice per day in the morning and after operations.

- Washrooms will be cleaned once per day after operations (floors, walls, switches, sinks, mirrors, accessories, windows, and toilets).

- Employees will sanitize their desktops, keyboards, monitor, phones, mobile phones, cabinet handles, and other surfaces they touch on regular basis, upon arrival at their workstation.

- Cleaning personnel will refill soap and alcohol dispensers when only about 1/4 of the contents is remaining.

- Alcohols and bleach supplies must be stored securely to prevent hazards and inventoried properly. All sanitation supplies must be inventoried monthly and reviewed by the OSH committee each quarter.

- Small trash bins must be lined with plastic and emptied into a larger trash bag to be taken outside after operations. Emptied bins must be thoroughly sprayed with a bleach solution on all surfaces after the last employee has left the work area.

- Chairs with fabric-lined seats must be covered in static plastic wrap for easy wiping.

- Light switches, remote controls, machine buttons (copier, printer, fax, etc.) must be covered in plastic for easy wiping.

- Water dispense faucets must be covered with a plastic flap to reduce exposure and for easy wiping.

- OSH committee members shall observe the proper cleaning protocols of cleaners during operations. A designated staff will review CCTV footage to ensure proper cleaning protocols are carried out before and after operations.

V. Worksite Exposure to COVID-19 Scenarios

1. Employee Exhibits COVID-19 Symptoms Offsite or at Home

If an employee exhibits COVID-19 symptoms, the employee must remain at home and self-isolate until he or she is symptom free for 72 hours (3 full days) without the use of fever-reducing or other symptom-altering medicines (e.g., paracetamol, cough suppressants, pain killer). HR will contact the employee periodically to monitor condition, to conduct or refer for contract tracing among employees if employee has been to a work site within 30 days prior to testing.

2. Employee Exhibits COVID-19 Symptoms upon arrival at the office

If any employee exhibits symptoms of COVID-19 during health screening procedures at the entrance of the building, he/she will be taken by the building security to an isolation area to wait until a recommendation from a medical professional is provided. HR will contact the employee for further instructions. Follow the procedures in Annex D.

3. Employee Exhibits COVID-19 Symptoms while on duty

If any employee exhibits symptoms of COVID-19 while inside the office and during a shift, he/she will be taken by an OSH personnel to an isolation area to wait until a recommendation from a medical professional is provided. HR will contact the employee for further instructions. Follow the procedures in Annex D.

4. Employee Tests Positive for COVID-19

An employee who tests positive for COVID-19 will be directed to stay at home and self-isolate. HR will contact the employee periodically to monitor condition, to conduct or refer for contract tracing among employees if employee has been to a work site within 30 days prior to testing.

If the Company learns that an employee has tested positive, the Company will conduct an investigation to determine co-workers who may have had close contact with the confirmed positive employee in the prior 14 days and direct those individuals who have had close contact with the confirmed-positive employee to self-quarantine for 14 days from the last date of close contact with that employee.

If applicable, the Company will also notify clients, vendors/suppliers or visitors who may have had close contact with the confirmed-positive employee. If an employee learns that he or she has come into close contact with a confirmed-positive individual outside of the workplace, he/she must alert HR, the Department/Account Manager or Supervisor and self-quarantine for 14 days from the last date of close contact with that individual.

5. Employee Has Close Contact with an Individual Who Has Tested Positive for COVID-19

Employees who have come into close contact with an individual who has tested positive for COVID-19 (co-worker or otherwise) will be directed to stay home and self-isolate for 14 days from the last date of close contact with that individual. Close contact is defined as six (6) feet for a prolonged period of time.

Returning to Work After Recovery

To the extent practical, employees who exhibited or exhibits one of the known symptoms of COVID-19 but have not been tested are required to obtain a doctor's note clearing them to return to work. Employees who test positive and have been hospitalized may return to work when directed to do so by their medical care providers and after documentation clearing his or her return to work.

VI. OSH Recordkeeping

If an employee has a confirmed case of COVID-19, the Company will conduct an assessment of the worksite exposures to determine if the case is work-related. Work-relatedness is presumed for illnesses that result from events or exposures in the work environment unless it meets certain exceptions.

One of those exceptions is that the illness involves signs or symptoms that surface at work but result solely from a non-work-related event or exposure that occurs outside of the work environment. Thus, if an employee develops COVID-19 solely from an exposure outside of the work environment, it would not be work-related, and thus not recordable.

The Company's assessment will consider the work environment itself, the type of work performed, the risk of person-to-person transmission given the work environment, and other factors such as community spread.

VII. Confidentiality/Privacy

Except for circumstances in which the Company is legally required to report workplace occurrences of communicable disease, the confidentiality of all medical conditions will be maintained in accordance with applicable law and to the extent practical under the circumstances. When it is required, the number of persons who will be informed that an unnamed employee has tested positive will be kept to the minimum needed to comply with reporting requirements and to limit the potential for transmission to others.

The Company reserves the right to inform other employees that an unnamed co-worker has been diagnosed with COVID-19 if the other employees might have been exposed to the disease so the employees may take measures to protect their own health. The Company also reserves the right to inform clients, vendors/suppliers or visitors that an unnamed employee has been diagnosed with COVID-19 if they might have been exposed to the disease so those individuals may take measures to protect their own health.

VIII. General Questions

Given the fast-developing nature of the COVID-19 outbreak, the Company may modify this Plan on a case by case basis. If you have any questions concerning this Plan, please contact HR Communications.
